

G-SERIES
SMALL FRAMES

JOHN DEERE

312GR / 314G / 316GR / 317G / 318G

**MORE CHOICES,
MORE ABILITY**

316G R

PURPOSE-BU

RELIABLE

PRODUCTIVE

MILT FOR **ALL** YOUR PURPOSES.

YOUR INSPIRATION, OUR INNOVATION.

Before hitting the G-Series drawing board, we hit the phones and the road — connecting with skid steer and compact track loader (CTL) users like you to find out what they need. We listened, then rolled up our sleeves and applied what we learned. The result? Five compact models in vertical-lift and radial-boom configurations. With a look and feel like their larger siblings, plus amped-up specs and a wider variety of options, these reimagined do-it-alls have what it takes to fit the way you work, wherever you work.

SMALL MACHINES. BIG RESULTS

DON'T LET THE SIZE FOOL YOU.

Whether you're acquiring your first machine or adding to a fleet, there's a John Deere G-Series Skid Steer or CTL that's all-in for you.

Entry-level models

Looking for a basic skid steer? The value-packed 312GR and 314G offer the choice of a radial- or vertical-lift boom. Equipped with manual controls and fuel-efficient diesels, they're easy to operate and own.

More power and options

If you're seeking a more powerful, better-equipped machine, step up to the 316GR and 318G. These larger-performance models also offer more options including joystick controls, air conditioning, and ride control, to list just a few.

Beast mode

Check the 317G CTL specs. Superior pushing power and breakout force deliver the tractive effort and leverage to dig in where other machines just spin.

Lightweight transport

With weights from only 5,995 to 8,195 lb., these compacts are easy to trailer behind a standard pickup truck.

Generous FT4 power

Turbocharged 2.1-L EPA Final Tier 4 (FT4)/EU Stage IV diesels meet rigid emission standards, run smooth, and pack plenty of power and torque.

When smaller is smarter

Size up a G-Series. Wheel options enable them to slim down and fit through narrow openings.

Pick up the pace

Two-speed option in the 316GR and 318G provides faster transport speeds, to help boost productivity.

Dig, pry, push

Ample axle torque and increased boom and bucket breakout forces help carve out clay, push through piles, and keep the bucket heaped.

Tread lightly

Equipped with optional 15.8-in.-wide track, the 317G CTL's ground pressure is just 4.5 psi, enabling work in soft underfoot conditions. Helps increase side-slope stability, too. With standard 12.6-in.-wide track, ground pressure is only 5.5 psi.

Space commander

With widths at less than 72 in. with optional 15.8-in. track and just over 65 in. with standard 12.6-in. track, little gets in the way of the 317G CTL. Its small stature makes it easy to trailer, too.

**NARROW MACHINE WIDTHS
ENABLE EASY TRANSPORT
BETWEEN JOBSITES**

STANDOUT FEATURE

***ELEVATED.
BY DESIGN.***

BOOM LIFT

RADIAL OR VERTICAL

This reimagined loader rises high, picks up heavy loads, and delivers remarkable boom- and bucket-breakout forces. Plus, a low center of gravity and superior balance provide exceptional agility and stability on slopes. Choose between vertical or radial lift to match your application.

WHAT'S THE DIFFERENCE?

RADIAL LIFT

More reach at mid-range lift heights; good for digging, grading, and backfilling.

VERTICAL LIFT

More lift height and reach at the top of the lift path, for more stability.

Power lifter

Redesigned vertical-lift boom rises to 10 ft. 1 in. Combined with a rated operating capacity of 2,125 lb., the 317G CTL precisely places pallets and carries big loads.

Carry more, spill less

Boom design keeps the load close to the machine, for better stability. Low center of gravity, 30-deg. bucket rollback, optional hydraulic self-leveling, and optional ride control (316GR, 318G, and 317G CTL only) also help keep buckets full and forks loaded.

Boom-diggity

Radial-lift booms on the 312GR and 316GR provide powerful digging performance and generous lift height at a competitive price. For even more lifting ability, opt for the 314G, 318G, or 317G CTL with vertical-lift booms that deliver outstanding lifting and truck-loading ability.

TAKE A LOAD OFF

ENHANCED ABILITY — AND COMFORT, TOO.

With our G-Series, compact doesn't mean cramped. Larger entryways with doors that swing out make it easier to get in, get comfortable, and get on with it. Inside, there's more foot- and legroom. The tightly sealed interior is quieter, too, so you can concentrate on the job at hand — and even enjoy the radio. Operators will also appreciate what they see from the comfortable sculpted seat. Clear sightlines to the cutting edge and bucket corners, above and below the lift arms, and the jobsite ahead and behind instill confidence when working in close quarters.

25%
MORE CAB SPACE

Heads-up operation

Overhead panel conveniently places machine info on the left, control switches to the right. Easy-to-read LCD monitor provides a wealth of info and control — including vital operating conditions and advanced diagnostics.

Push-button convenience

Optional sealed-switch module provides access to keyless start and anti-theft settings, plus fingertip activation of numerous machine functions including optional ride control (316GR, 318G, and 317G CTL only) and hydraulic self-leveling.

Safety first

Standard to all John Deere machines, personal-protection features abound. An in-cab-activated boom lock and a triple-interlock system that detects the presence of the operator help keep harm's way at bay.

Your controls, your way

Low-effort foot pedals are standard on skid steers; manual hand controls are available. Electrohydraulic (EH) joysticks are standard on the 317G CTL, optional on 316GR and 318G Skid Steers.

Four-season comfort

For year-round comfort, air conditioning is available in 316GR, 318G, and 317G CTL models.

Enhanced visibility

Optional LED light package with integrated side lighting (316GR, 318G, and 317G CTL only) provides superb all-around illumination.

Riding high

Adjustable high-back sculpted seat provides daylong comfort and support. For even more comfort, a heated air-ride seat is available on all models.

LIGHTWEIGHT AGILITY.
**HEAVY-DUTY
DURABILITY**

BIG-TIME UPTIME

MORE EFFICIENT IN EVERY WAY.

Incorporating many of the same durability and reliability features found on our larger machines, the G-Series is as tough as they come. Uptime advantages such as rugged Yanmar engines, sealed electrical connectors, O-ring face-seal hydraulic fittings, large coolers, and extended service intervals help keep downtime down. Plus, a standard automatic shutdown system prevents overheating or low fluids from ruining more than just your day. When you know how they're built, you'll run a Deere.

Heavy-duty drivetrains

Oil-bathed final-drive chains withstand daily punishment and never need adjustment. Beefed-up drive sprockets also deliver long-term durability.

Fewer refills

Refueling and other fluid additions are convenient and quick. Generous tank capacity and fuel-efficient diesels enable daylong operation, letting you accomplish more between fill-ups.

Big biceps

Large cross-section boom arms and heavy-duty upper links deliver the stamina to endure tough tasks, for long-term durability.

Chill out

Large coolers increase heat rejection for superior performance in severe, high-load conditions. Engine-mounted, belt-driven cooling fan delivers efficient, reliable performance.

Anti-leak fittings

O-ring face-seal hydraulic fittings virtually eliminate aggravating and costly oil leaks.

Sealed connections

Switches and electrical connectors are sealed from moisture and dirt, to help resist corrosion.

Give yourself a brake

Spring-applied hydraulically released wet-disc park brakes never need adjustment, to help take the pressure off sure stops.

8+ HOURS
OF RUN TIME BETWEEN REFILLS*

**Fuel consumption varies by application and machine use.*

INCREASE UTILIZATION

MULTITASKING MADE EASIER.

With over 100 models of available Worksite Pro™ attachments, your G-Series Skid Steer or CTL can be hooked up with a wide variety of options. And with the universal Quik-Tatch™, you can go from bucket, to forks, to whatever, in just seconds. Each compact model delivers plenty of standard hydraulic power to operate augers, hammers, trenchers, or power rakes, to list just a few.

Bucket choices abound

Choose from rock, multipurpose, construction, utility, and tooth buckets in varying widths and capacities. Grading-heel bucket excels at back dragging.

Grab and go

Brush, scrap, and utility grapples employ two hydraulic-actuated dual-action tongs for superior retention of a wide variety of materials.

Snow attachments

Equipped with a snow blower, snow pusher, utility blade, or angle broom, G-Series machines make quick work of clearing whatever winter drops your way.

100+ MODELS OF WORKSITE PRO ATTACHMENTS

Roadwork made easy

Perfect for concrete or asphalt flatwork, our angle brooms, vibratory rollers, cold planers, hydraulic hammers, and wide variety of buckets let you hit the road running.

Landscape add-ons

Landscape and nursery options include rotary tillers, planetary augers, pallet forks, power rakes, landplanes, dozer blades, and roller levels, to list just a few.

Busybody

With go-everywhere rubber track undercarriage, universal Quik-Tatch, and auxiliary hydraulics, the 317G CTL is fully equipped to tackle a seemingly endless variety of tasks.

Farm hands

For handling hay, cleaning pens, rebedding stalls, or numerous other agricultural chores, add utility grapples, material/manure scrapers, pallet forks, bale spears, and buckets to get it done.

WE SWEAT THE DETAILS

SO YOU DON'T HAVE TO.

Simple serviceability

Swing-out rear door enables easy, ground-level access to daily service checkpoints and cooling system components. If major component access is necessary, the ROPS can be tilted in less than five minutes.

Minimal maintenance

Redesigned Quik-Tatch system is optimized for effortless reach to grease zerks, minimizing maintenance time and expense.

Full-tilt service

Swing open the rear door and tilt up the hood for convenient ground-level access to dipsticks, fuel- and fluid-filler necks, and filters. For easy drivetrain access, the operator's station also swings up and out of the way in less than five minutes.

Easier cooler cleanout

Hinged rear door and hydraulic cooler swing open, making trash removal and core cleanout easier.

Simplified checks

Color-coded handles and caps on conveniently positioned dipsticks and filler necks simplify checks and additions. See-through reservoirs and sight gauges let you check fuel, hydraulic oil, and windshield washer fluid levels at a glance.

Easy cleanup

If you're a neat freak or run a rental yard, you'll appreciate the convenient floor access that helps speed cleanout.

Quick changes

Spin-on remote-mounted engine oil and fuel filters allow quick no-mess changes. Extended service intervals reduce downtime for scheduled maintenance, too.

Handy boom tie-down

Integrated boom tie-down enables easy access without having to crawl under the machine.

●	●	●	●	●	Horn

*500-hour engine oil-change intervals when John Deere Plus-50 oil and John Deere oil filter are used.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at standard conditions per SAE J1349 and DIN 6270B, using No. 2-D fuel at 35 API gravity. Gross power is without cooling fan. Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with standard equipment, full fuel tanks, and 79-kg (175-lb.) operator.

Additional equipment *(continued)*

GOING THE EXTRA MILE
FOR YOU.

THERE ARE NO SMALL JOBS. Every day you go the extra mile to reflect your high standards — and you need equipment that delivers. That's why every John Deere machine is designed and built to **exceed** all your efficiency, uptime, and profitability needs — so you can **RUN YOUR WORLD.**
